

INDEPENDENT EMERGENCY PHYSICIANS

Improving health and healthcare

The Strength of Ownership

IEP was founded by eleven like minded physician entrepreneurs on the belief that a collaborative practice environment yields better patient and business outcomes. Twenty years later, we are still physicians and business owners, providing outstanding clinical services and operational leadership for our hospital partners, and excellent, compassionate care for our patients.

Culture-driven Results

At IEP, we believe that culture is defined by actions not words, and we've built a culture of ownership through cultivating, retaining, and promoting outstanding clinical leaders and the very best providers. Our providers are more than employees, they are partners in our business and have a personal commitment to our success and the success of our patients and hospital partners.

Engaged Practice Management

We believe engaged practice management is the direct result of outstanding leadership, operational excellence and outstanding clinical providers. We are influential and passionate leaders who love a challenge and find great satisfaction in making a difference for our physicians, our patients and our hospitals.

Our Promise

Our promise, is to create the best possible patient experience and health outcomes. We go beyond service delivery to adopt a leadership role in helping hospitals and health systems transform health and health care.
